

Online Workshops for Lesson Study 2.0:
Artificial Intelligence (AI) and Data Science for Education in APEC Economies

The Ministry of Higher Education, Science, Research and Innovation (MHESI), Thailand
and the Institute for Research and Development in Teaching Profession for ASEAN (IRDTP), Khon Kaen University,
Thailand and the Center for Research in Mathematics Education (CRME), Khon Kaen University, Thailand

Lesson Study through the Internet

Dr. Wahyudi, SEAMOLEC Director

Presented at: Online Workshops for Lesson Study 2.0: Artificial Intelligence (AI) and Data Science for Education in APEC Economies, 18 October 2022, 18-21hrs: GMT+7, BKK time

Outline

This presentation will specifically address the following 3 items:

Introduction

SEAMOLEC in Brief

Lesson Study – Before and During Pandemic

Adaptation of LS during Pandemic

Way Forwards

LS through the Internet?

SEAMOLEC in Brief

SEAMOLEC

SEAMEO REGIONAL OPEN LEARNING CENTRE
(Est - 27 February 1997)

Hosted by:

Ministry of Education, Culture,
Research and Technology,
Republic of Indonesia

Located in:

Open University Complex,
Tangerang Selatan, Banten
Indonesia

Vision:

To be the Centre of expertise
in Open and Distance Learning
(ODL)

Mission:

To assist SEAMEO Member
Countries in identifying
educational problems and
finding alternative solutions for
sustainable human resource
development through the
dissemination and effective use
of ODL

Training

Research & Development

SEAMOLEC 4 Core Tasks

Consultancy Services

Information Dissemination

SEAMOLEC MOOC

Massive Open Online Courses

Course

96 Courses

Consist of 51 Open Educational Resources and 45 Massive Open Online Courses

Content

1000 + Content

Consist of 1000 content under MOOC SEAMOLEC

USERS

53250 Users

Total Users listed on mooc.seamolec.org of 53250 Users

Online Trainings by SEAMOLEC on 2016–now

Regional (English)

Training programmes for Educators

1. Optimization of office applications
2. Cloud-based office applications
3. Design presentations
4. Design infographics
5. Development of learning video
6. Development of whiteboard animation
7. Educational comic
8. Blog as a learning media
9. Android block programming
10. 3D Visualization
11. Augmented Reality Development
12. Virtual Reality Development
13. Internet of Things
14. GNS3-based LAN Simulation
15. Digital class

Metaverse

- Metaverse is the "Next Generation" of the internet that facilitates users to connect with each other, presenting interactions and immersive experiences.
- Metaverse could exchange information, interact socially, have creative spaces, collaborate, and conduct learning discussions as well as simulations for training and laboratory work.

COVID-19

COVID-led IOT Adoption across Vertical Segments

Source: Zinnov Analysis of 150+ organizations deploying IOT during COVID-19

Adoption Intensity:

Low

Medium

– 18th Century

Industry 1.0

Mechanical production
equipment powered by
steam

– 19th Century

Industry 2.0

Mass production assembly
lines requiring labour and
electrical energy

– 20th Century

Industry 3.0

Automated production
using electronics and IT

– Today

Industry 4.0

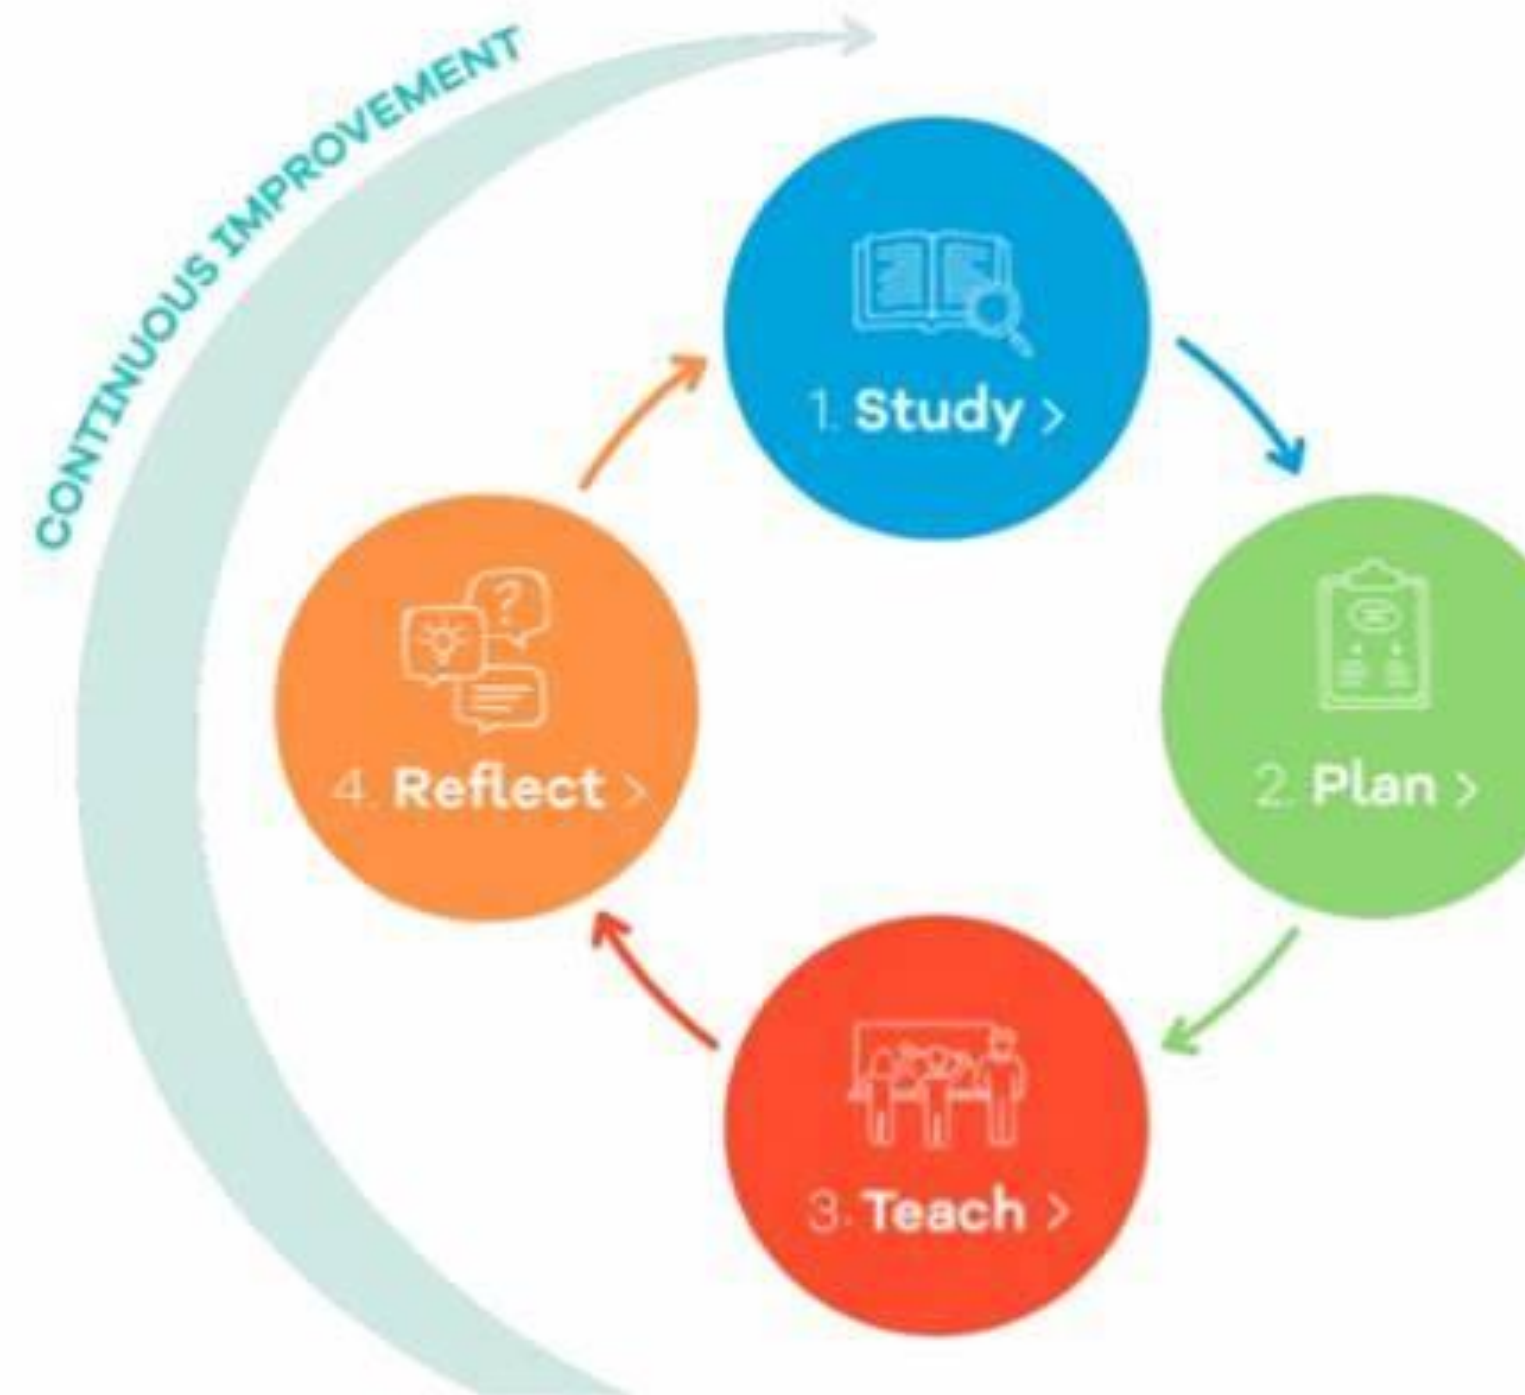

Intelligent production
incorporated with IoT,
cloud technology & big data

THE POWER OF INTERNET FOR LS?

Merits & Demerits of Internet

- Today internet has brought the globe into a single room.
- Right from news across the corner of the world, wealth of knowledge to shopping, purchasing the tickets of your favorite movie-everything is at your finger tips.
- Internet has great potential and lot to offer...
- However, like every single innovation in science and technology, internet has its own advantages and disadvantages.
- Though, internet can also create havoc, destruction and its misuse can be very fatal, the its advantages outweigh its disadvantages.

LS BEFORE COVID-19

Lesson Study in Malang, Jawa Timur – Using Microsoft Team

1. Mr Arifin – SEAQiM's Alumni of LS
2016

2. Implemented LS in his School via
MGMP

3. Using Microsoft Team Platform

4. Challenges

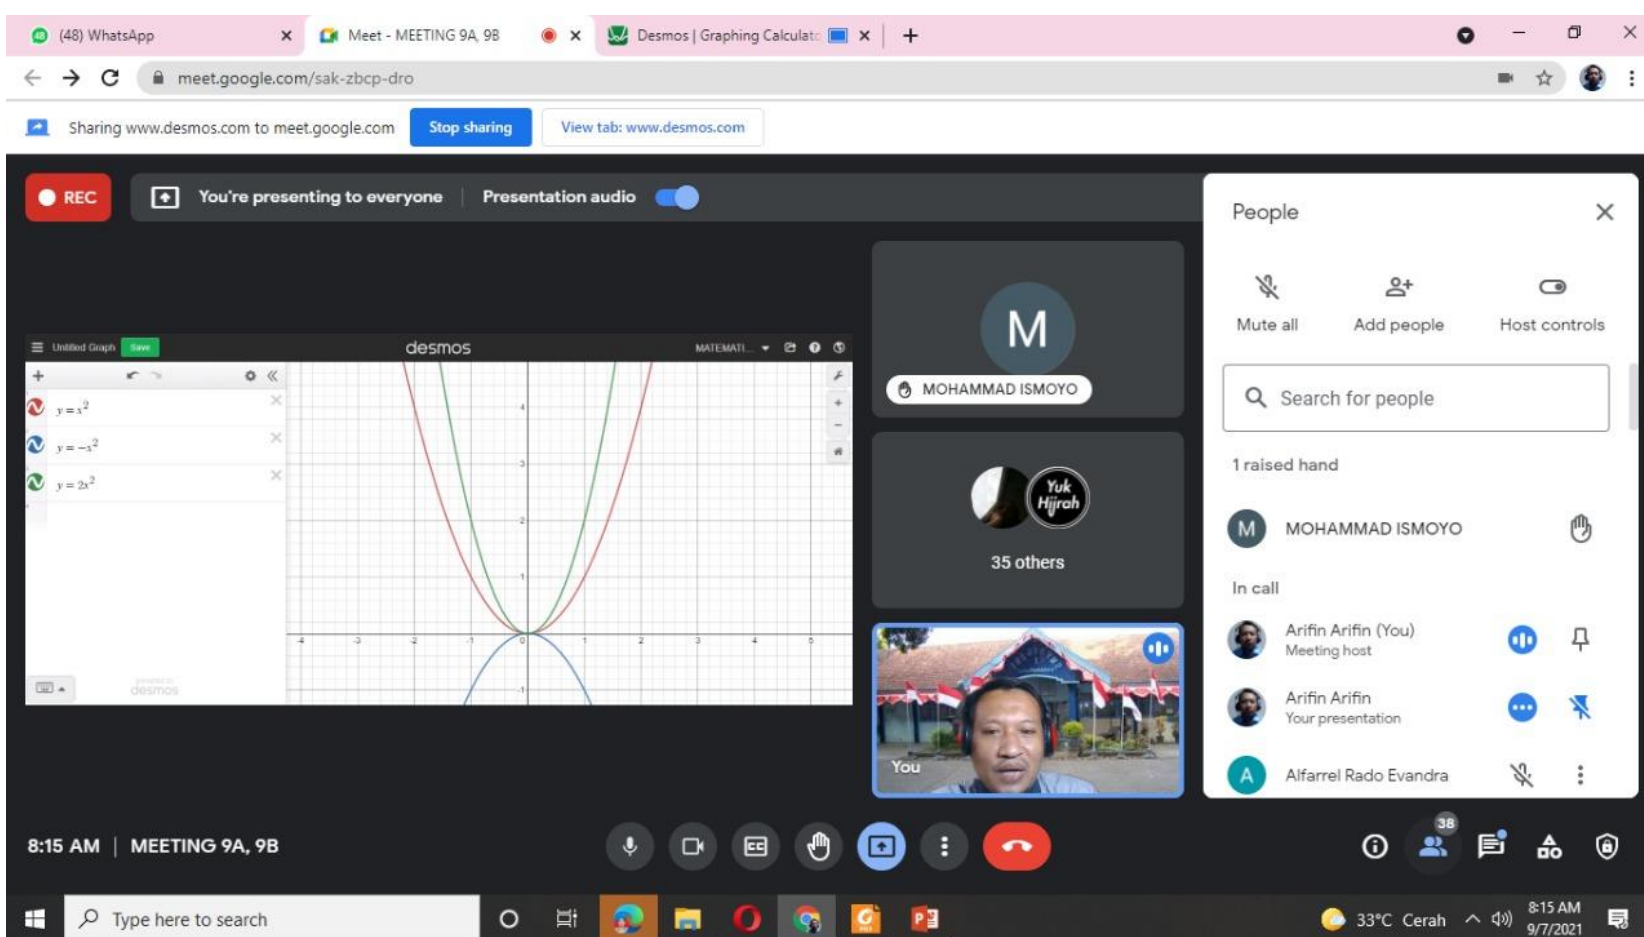

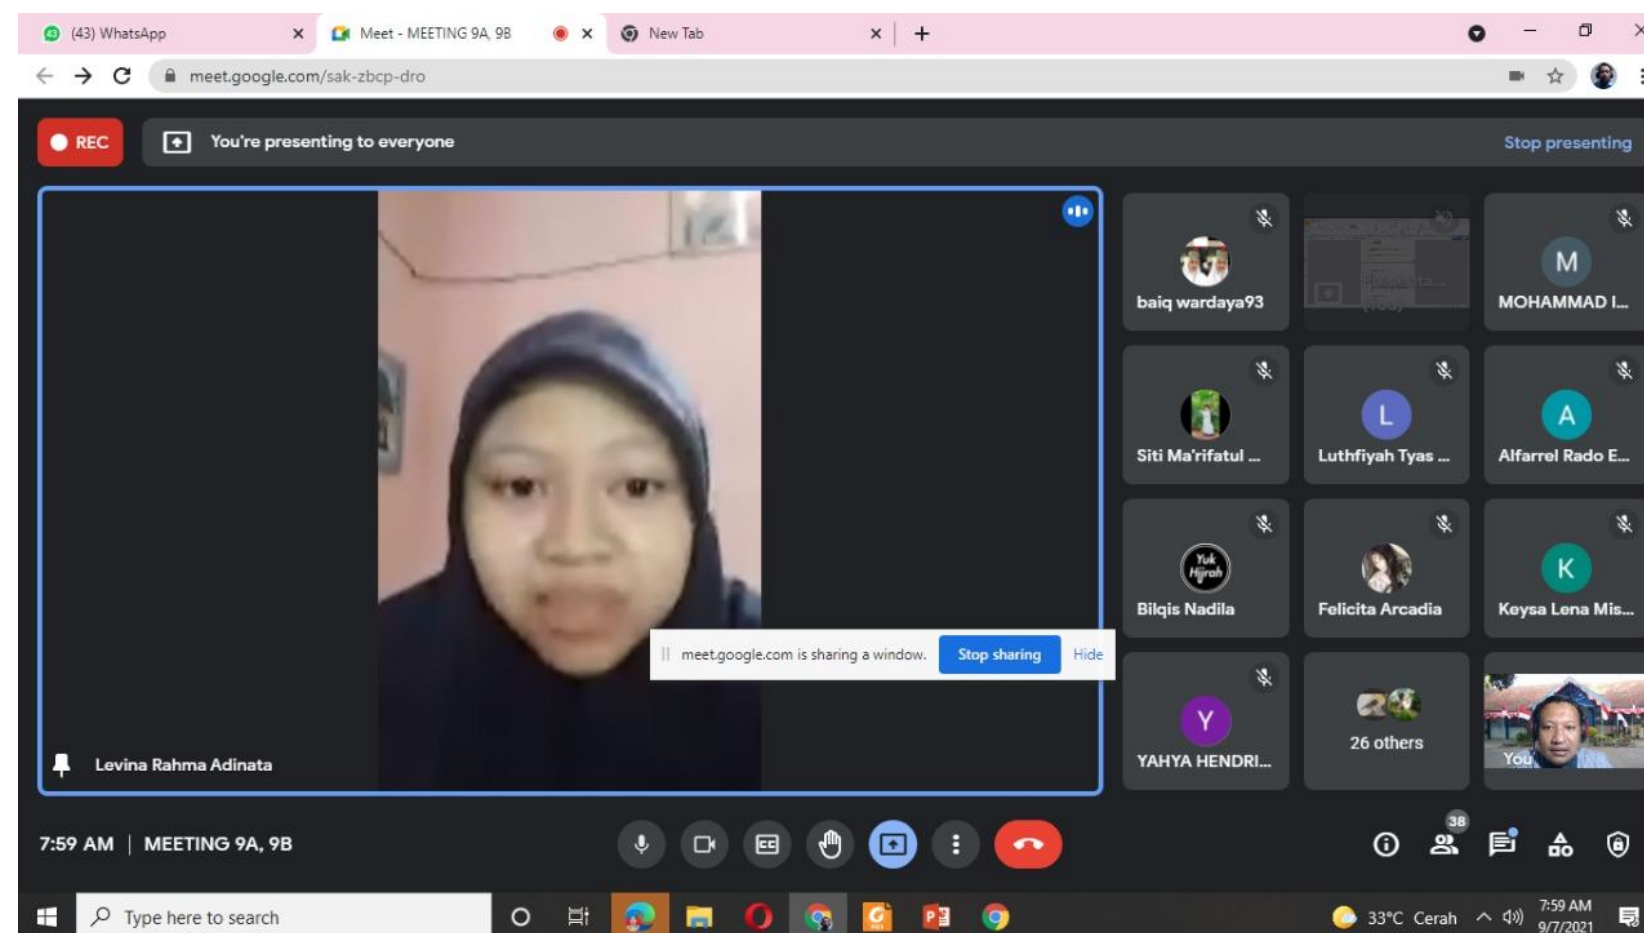

5. Promises

6. The Way Forward

**Did you and your colleagues
(can be local or international)
conduct LS during the
pandemics?**

Yes we did

How did you and your colleagues communicate (observation, sharing T& Learning activities, reflection etc.)? Which online platform did you use frequently?

We usually communicated through team meeting virtually in every MGMP schedule on Thursday. Also, we decide the teaching material presented by the teacher model.

What is the challenge in so doing virtual observation and reflection?

Very limited not maximally observed

The image shows a Microsoft Teams meeting interface with a whiteboard containing handwritten mathematical problems. Below the Teams interface is a screenshot of a Quizizz report for a class named 'Arifin Arifin'.

Microsoft Teams Meeting:

- Meeting title: (2) Memahami Perkalian Ber...
- URL: teams.microsoft.com/_/pre-join-calling/19:0c22596a03074c8a84f6b178eb898ea0@thread.tacv2
- Status: You're recording
- Whiteboard content:
 - $x \text{ Pok Idnis Lvs} = x \cdot x = x^2$
 - $\text{Pok Tohir } \boxed{x-15} \text{ Lvs} = p \times l$
 - $\begin{aligned} &= (x+20)(x-15) \\ &= x^2 - 15x + 20x - 300 \\ &= x^2 + 5x - 300 \end{aligned}$

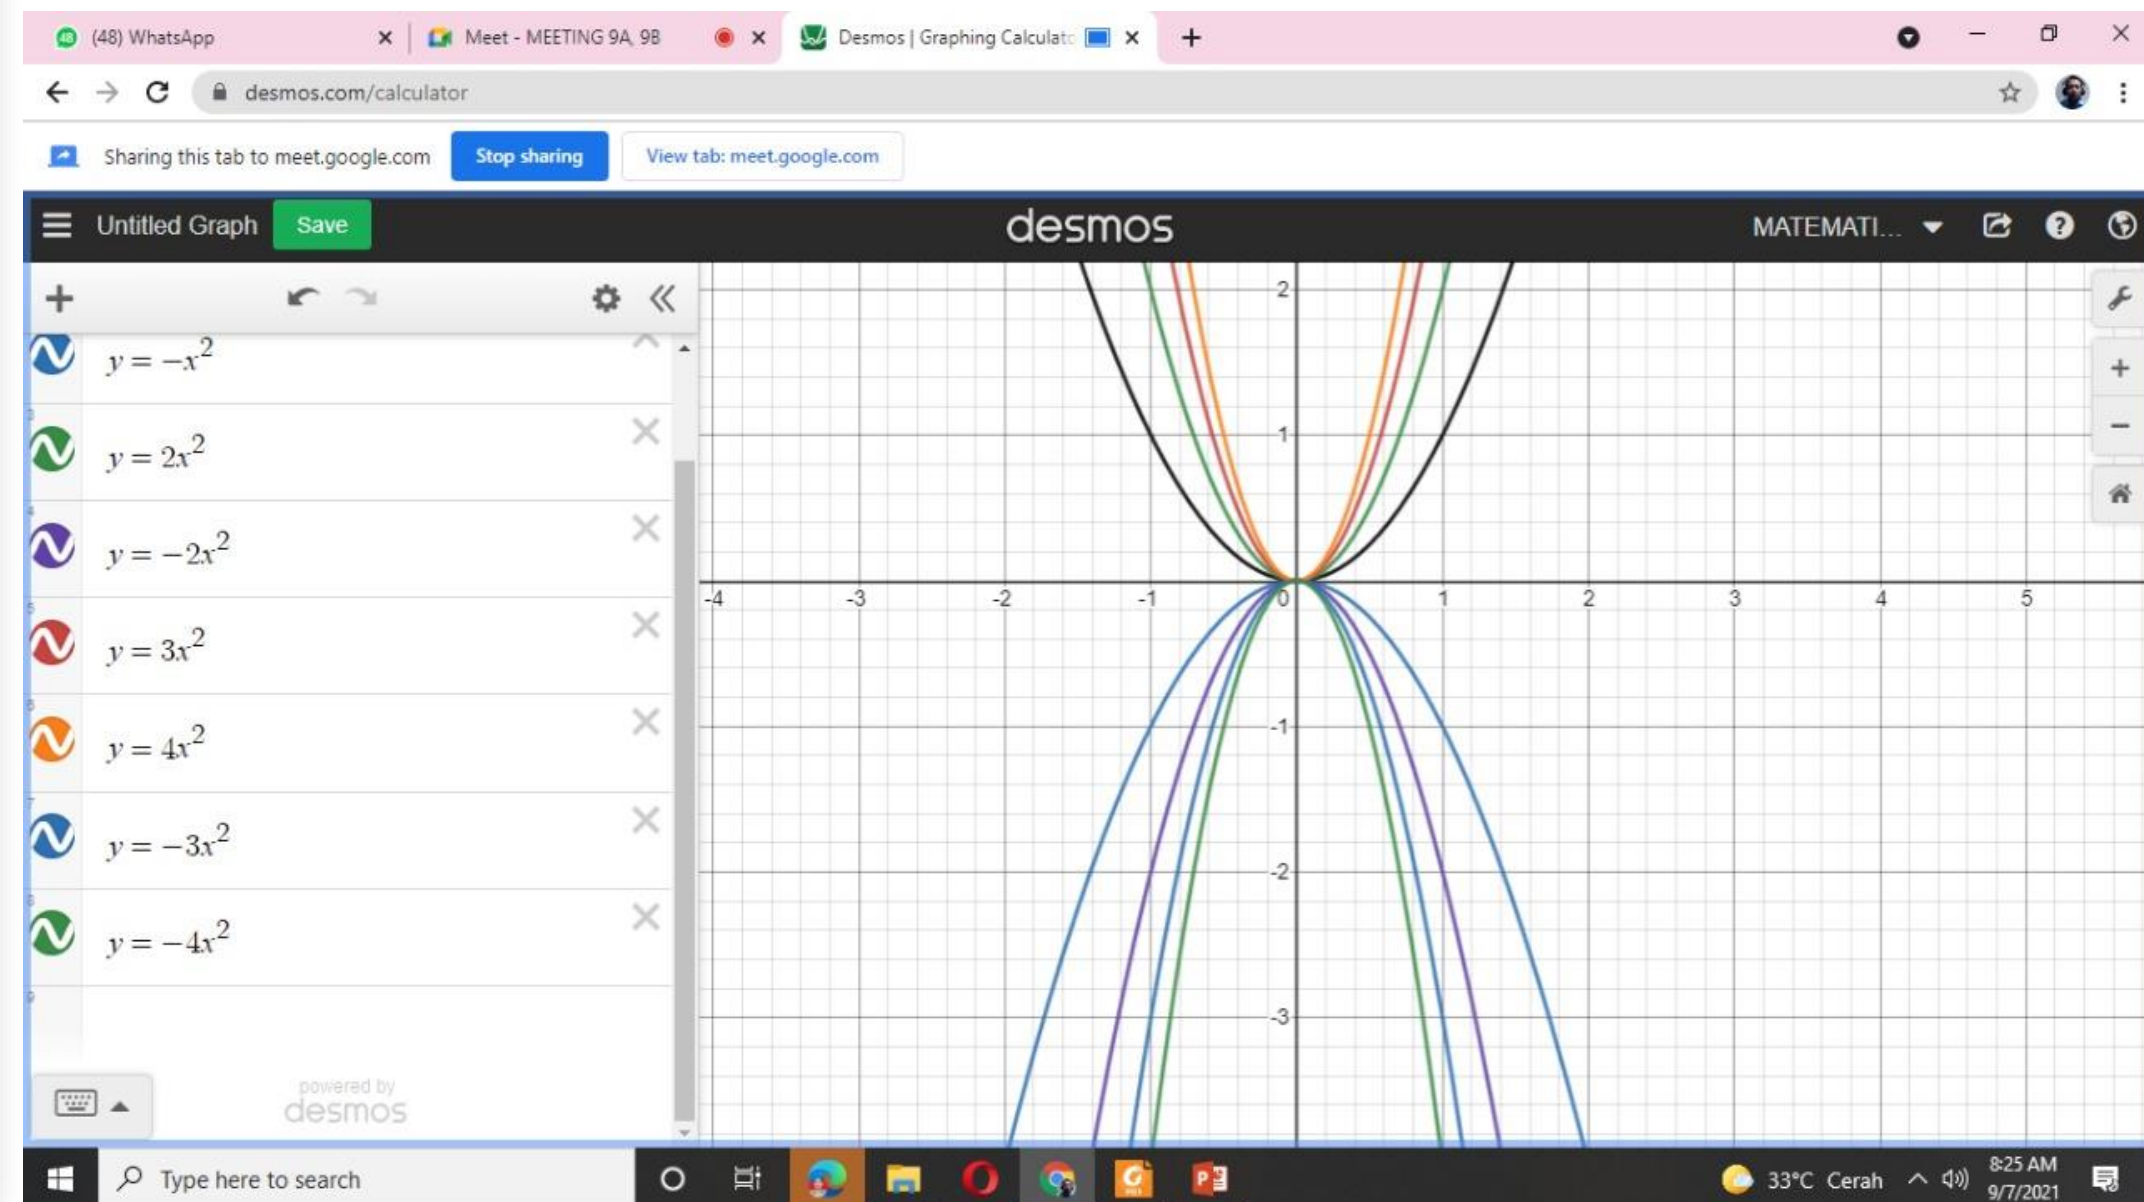

Quizizz Report:

Student	Attempts	Accuracy	Score	Action
Keysa Lena (Keysa L...)	3 attempts	100%	9790	Email to Parent
arifin fin*	2 attempts	90%	7630	Email to Parent
Luthfiyah Ayuningru...	1 attempt	70%	5770	Email to Parent
Nailatul M (Nailatul ...)	2 attempts	30%	2840	Email to Parent
Septimia Purwanega...	2 attempts	30%	2830	Email to Parent
Inka fitri farelia 9C 17	1 attempt	40%	2730	Email to Parent
Nayla Irawan (Nayla...	1 attempt	30%	2680	Email to Parent
Firda Mareza	1 attempt	30%	2410	Email to Parent

What is the benefits in so doing virtual observation and reflection?

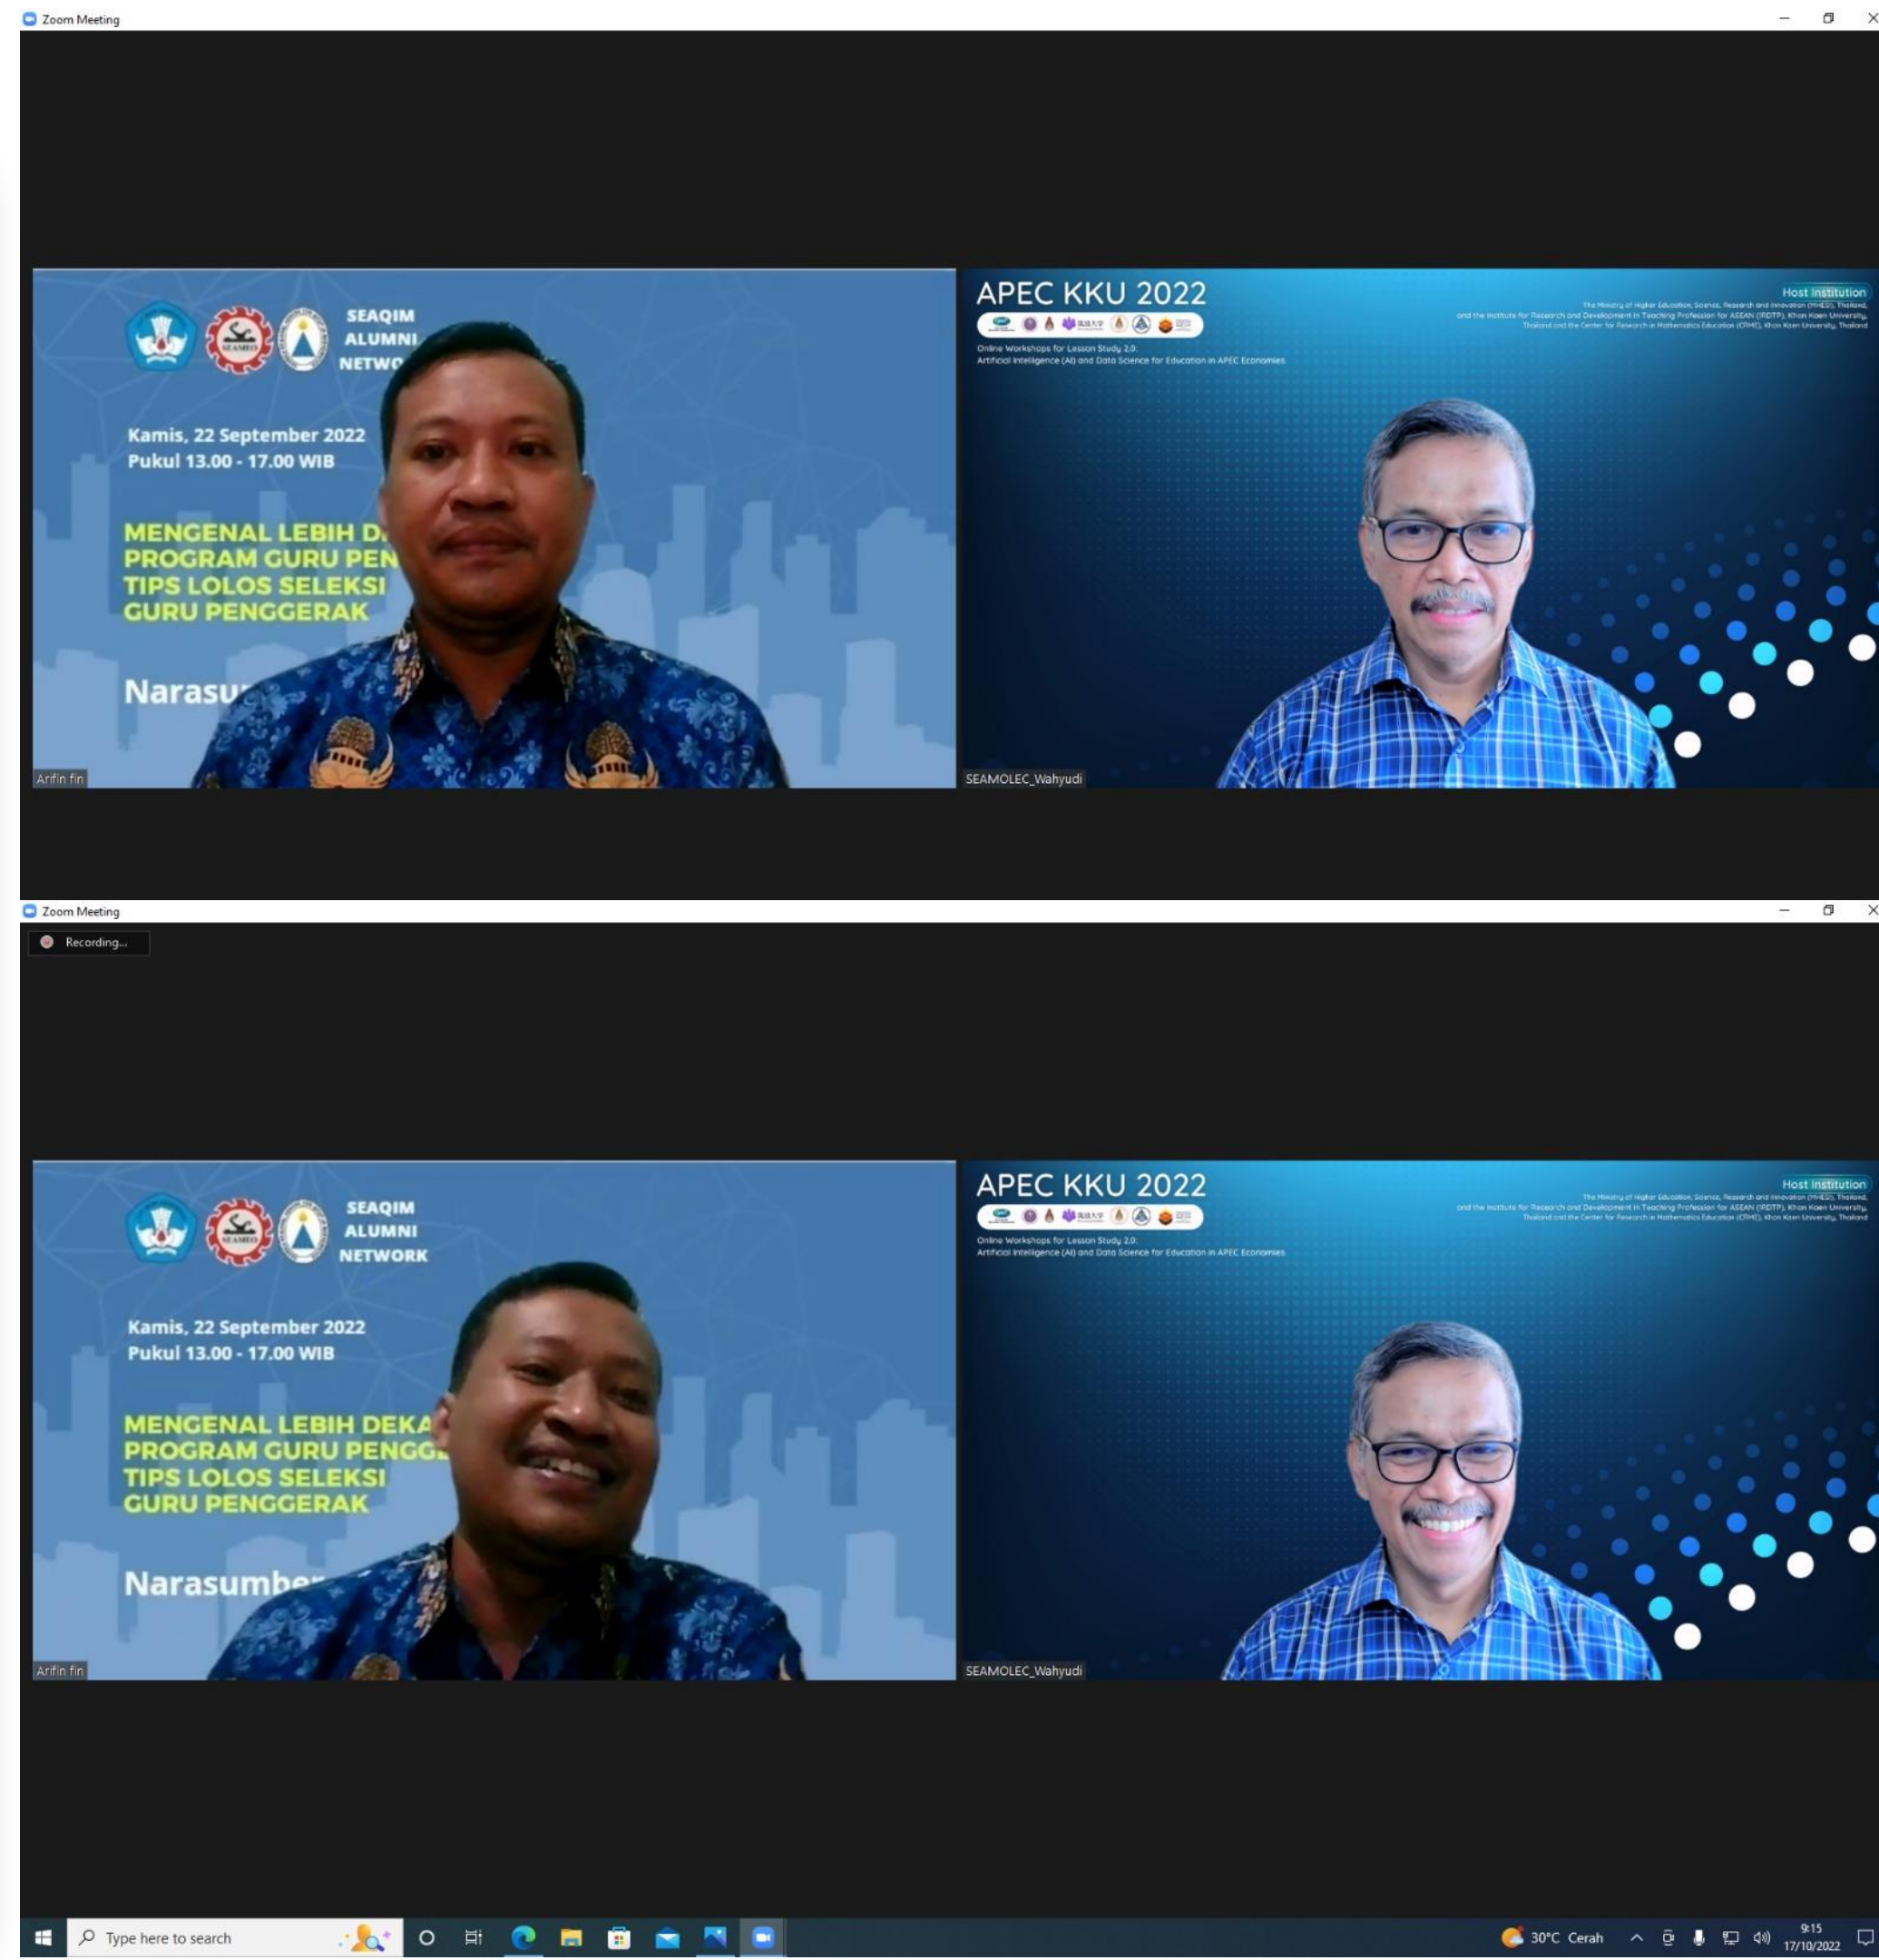

- Observations can be recorded
- Using teams and Google meet in various way for learning, sharing for evaluation. The benefit of using teams, we can place the assignment, make a recording, and recap the students' activeness in meeting.

The Way Forwards

Continuous
commitment
and
collaborations
